# Free Schema Markup Checklist PDF Content

Free Schema Markup Checklist

Your Simple Guide to Boosting SEO with Structured Data

A schema markup example of local bakery search.

Get ready to supercharge your SEO! This checklist gives you the exact schema markup code to make your website stand out in search results. Just copy, paste, and watch your clicks soar.

Welcome to Your Schema Markup Checklist!

If you're looking to make your website pop in Google search results, schema markup is the way to go. This checklist is your no-fuss guide to adding structured data that tells search engines exactly what your content is about. Below, you'll find the JSON-LD code for a downloadable resource (like this checklist!). It's ready to use, just swap in your website's details and add it to your site.

Why use this? It helps search engines show richer results, like star ratings or download links, which can drive more clicks to your site. Let's get started!

Schema Markup Checklist Code

Copy the code below and add it to your webpage's `<head>` or `<body>` section. Replace placeholders like "yourwebsite.com" and "Your Website Name" with your own details. This code tells search engines your checklist is a free, downloadable PDF, helping it shine in search results.

Code Block:

```json
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "DigitalDocument",
  "name": "Free Schema Markup Checklist",
  "description": "Your go-to checklist for adding schema markup to boost SEO, packed with easy steps, tools, and tips.",
  "url": "https://yourwebsite.com/free-schema-markup-checklist.pdf",
  "fileFormat": "application/pdf",
  "isAccessibleForFree": true,
  "author": {
    "@type": "Organization",
    "name": "Your Website Name"
  },
  "datePublished": "2025-04-24",
  "publisher": {
    "@type": "Organization",
    "name": "Your Website Name",
```

```
  "logo": {
    "@type": "ImageObject",
    "url": "https://yourwebsite.com/logo.png"
  }
 },
 "keywords": "schema markup, SEO, structured data",
 "inLanguage": "en-US"
}
</script>
```

Note: Test this code with Google's Rich Results Test (search.google.com/test/rich-results) to make sure it's error-free!

Quick Tips to Use This Checklist

- **Customize It**: Update the "url," "name," and "logo" fields with your website's info to make the code your own.
- **Add It Right**: Paste the code into your webpage's HTML. If you're on WordPress, try a plugin like Yoast SEO for easy setup.
- **Check Your Work**: Use a schema validator (like Schema.org's tool) to confirm your markup is good to go.
